

Josh Cutler
Academic Staff Nominating Committee Candidate
Personal Statement
(Replace Jacob Hahn starting September 13, 2022 through June 30, 2023)

I am the Director of Facilities and Safety for the School of Pharmacy. I have been at the School of Pharmacy in my current roll for the past 6 years. Since coming here to the SoP I have served on the Safety and the Space Committees. Prior to coming to the School of Pharmacy I worked at the Law School for 12 years. There I was also on the Space Committee. I was a member of the University Staff congress while at the LS. I am currently an Alternate for the Academic Staff Assembly. During my time at the UW I have grown as a person and learned a lot about myself. I have become very interested in this great institution of ours and want to see it thrive on the world stage. When participating in the Kaufman Seminar it sparked my interest even more about the UW and how it runs. The research support role I play here at Pharmacy is exciting. I have learned how things are done from start to finish in RnD of drug delivery systems. See the research being done here is what keeps me working hard to make this the best SoP it can be. I work hard to do all I can to make the researchers and students of Pharmacy's experience here as easy as possible. I have always been in a support role in my career and enjoy it very much. I always want to be the go to person for whatever is needed and thrive on getting the job done. We are all in this journey together and from the bottom to the top we should have one goal that that is to make this a better place than when we got here. Shared governance helps us all to get our voices heard and makes us all feel like a great team.
