PROFESSIONAL DEVELOPMENT AND RECOGNITION COMMITTEE

CANDIDATE STATEMENTS

PHILLIP PELLITTERI - BIO/MED

I am a Senior Outreach Specialist and Senior Lecturer with the Department of Entomology and have been an academic staff member for 14 years. I have been the District 65 representative for four years, and have been involved with the Statewide Extension Council and a number of CALS and extension committees over the years.

Great progress has been made in recent years in recognizing the importance of academic staff at the campus level, but I would like to see college and unit recognitions become more widespread. We perform in so many important ways in keeping this campus functioning and we need to reward and make public the achievements of our fellow staff members. Enhancing the opportunities available for further professional growth also is of continuing importance. I would be happy to be involved with and work for these priorities.

JOANN ELDER - HUM/SST

Title: Senior Administrative Program Specialist. I have been an undergraduate advisor and administrator in the Department of Sociology for 23 years. Before that, I had been a lecturer and instructor in Sociology. Have a B.A. and M.A. from Oberlin College.

Have been involved in the development of academic staff governance and policy development for 20 years. A founder of the Madison Academic Staff Association, I also served on the first committee to consider the possibility of a role for academic staff in University governance. Was a member of, and Chair of the Academic Staff Committee, the "governance" committee before the current Assembly and Academic Staff Executive Committee were created.

Have served on many all-University committees, including the Bornstein Committee to review salary equity for academic staff (System Level), twice on Gender Equity Study Committees, on the Committee to End Discrimination in ROTC, the SOAR Task Force, several program review committees, and I have served as a member of the Hearing Examiner Panel for grievances for many years. I care very much about professional development for and the recognition of academic staff.
