

Academic Staff Communications Committee report 5-13-13

- As mentioned in an earlier report (at Assembly this year) ASCC conducted an evaluation of the existing AS website's use and functionality
- Based on what we learned the committee decided to develop a proposal to reorganize the site
 - Committee member, Laurie Silverberg took lead on developing a revised site map to improve usability and navigation.
- The site map was vetted by our committee and presented to the Secretary of AS and the ASEC Chair
 - Their feedback was incorporated in to the site map and it was presented to ASEC last week
- The site map has been approved by ASEC with two suggestions
 - To recruit volunteers to test the site while developing it
 - To explore using the DoIt Knowledge Base system
- Next steps are
 - ASCC will meet with DoIt, Learning Support Services and a recommended outside vendor to get estimates for the project
 - While ASCC may not formally meet over the summer the intention is to work with the Secretary's office to move forward with the reorganization of the website
