

Eric Giefer
NOMINATING COMMITTEE CANDIDATE PERSONAL STATEMENT
(Replace Erica Laughlin through June 30, 2017)

I've been the Director of IT for the Law School for the past 10 years and in addition to working with all the units in the Law school, I also work extensively with campus committees and other departments. I'm curious by nature and enjoy learning about other areas. I find working as part of a team very rewarding. I have campus committee experience in campus technology, search and screen for high level technology positions and also the administrative excellence process including being the current chair for MTAG which is advisory to Vice Chancellor Bruce Maas on technology. Coming from one of the professional schools, and having a background in IT, this gives me a unique perspective to bring to the nominations committee. Helping select and put forth strong candidates is a very valuable process in making successful shared governance and helping to advance university goals. I believe that my ability to both see a bigger picture and ability to work extremely well with details would be a valuable asset to the committee. Thank you for your consideration.
