

Hello Campus Partners,

I wanted to provide you an update on the current status of the Campus Classroom Safety and Locking project. I have attached a .pdf file of the Smartsheet we are using to track the progress. We are currently about 18% complete with the final project. The priority is being set by classroom availability. We are working with Abe Schrupp from Space Management to determine classroom schedules and to find the best window of opportunity to change out classroom hardware without disrupting any classroom sessions.

The first phase of the project is to change out the “low hanging fruit” and get to all of the classrooms that require a simple hardware change. The next phase will include returning to locations that require new doors, or more complex hardware changes. The final phase will be to return to classrooms with electronic locking to add an “override switch” that will remove the door schedule in an emergency, and send a signal to dispatch that the emergency button/override switch has been pushed.

Abe will soon be providing a tentative schedule for classroom availability over the summer. The physical plant plans on attacking the buildings with the highest number of doors to be switched out first. They will then work to schedule out as many other buildings as possible prior to the end of the summer. I will provide you updates as to progress throughout the summer.

The spreadsheet is color coded. Anything in red has not been started. Anything in yellow is partially complete. Anything in green is completed. The spreadsheet contains a lot of information, so the type is very small. I can provide an electronic copy if you would like to zoom in on specific sections for easier reading. If you have any questions regarding the spreadsheet, or would like me to go through the smartsheet with you, please let me know. Thank you for your support of this project and our efforts to improve classroom safety.
