Department On-Boarding

Math Department Experience

Kyle Martinez

“Seeing all the student data needed to evaluate the candidates and make awards, e.g. EFC, gift need, GPA, etc., in one spreadsheet is really useful and the whole reason I started using the application years ago.”

Aimee Lefkow (Research Program Manager, Physics)

“WiSH has helped streamline our department's scholarship processing, especially in the areas of communicating with students and collecting their post-acceptance thank you letters to donors. It's also nice that once an opportunity is created, it is easy to duplicate it for the next year's awarding cycle, which saves a lot of time once the initial set up is completed.”

Maria Hartwig (Undergraduate Advisor, Psychology)
